

### Overview:

SMB32 is a Remote SIM Bank with 32 SIMs. It connected with Hybertone GSM Gateway via internet. SIM cards no longer need to be installed in GSM Gateway anymore. You can deploy your VoIP GSM Gateway in different locations. Centralize and supervise all SIMs in one place, manage the entire system from your office.

This solution saves your time and significantly cuts your administration costs – no more travelling to the gateways, no more abuse of SIM cards.

The solution contains several components described below:

SMB32

### Features:

- Remote management
- Advanced control of SIM cards
- Automatic credit monitoring and recharging
- Advanced Simulation of Human behavior
- SIM rotation
- Set Talk Time per SIM
- Set GSM Group (Assign several SIMs Per GSM Port)
- Set Day of week
- Set Time Range

### Technical Specifications:

- **VoIP/ISDN:** SIP/H.323
- **DTMF sending:** REC2833
- **No. of voice channels:** 32
- **VoIP codec:**
  - G.711 PCM A-law/u-law (selectable)
  - G.729 Annex CS-ACELP at 8 kb/s
  - G.723.1 MP-MLQ/ACELP at 6,3/5,3 kb/s (optional)
- **Network bands:** GSM850/900/1800/1900MHz
- **Configuration way:** WEB interface

### Hardware Specifications:

- **Weight:** 1.5 kg (Including AC/DC Adapter)
- **Size:** 220 mm (W) x 370 mm (L) x 75 mm (H)
- **Power:** 12 V 2A (AC/DC adapter included)
- **Warranty:** one year
